INTEGRATED GMP MANUFACTURING, GLOBAL SUPPLY CHAINS & STRUCTURED CANNABIS TRADE

ABOUT US

A vertically integrated medicinal cannabis platform connecting manufacturing, global supply, and patient access.

The business combines GMP-compliant production and formulation with established international supply networks and multi-channel distribution, including wholesale, pharmacy, and telehealth. This integrated model enables Etharis to manage the full product lifecycle—from development and manufacturing through to patient access. Etharis sources competitively priced, high-quality medicinal cannabis products directly from origin markets, including Thailand, Canada, and South Africa, supplying licensed distributors, pharmacies, and partners across Australia, the United Kingdom, and Europe.

Operating across both domestic and international markets, Etharis is structured to be scalable while maintaining strong regulatory alignment and supply chain control. The company generates revenue through a diversified mix of contract manufacturing, white-label supply, global trading, and its own branded products.

OUR MISSION

To build a globally trusted cannabis supply and capital platform that delivers compliant, high-quality products across regulated markets while generating disciplined, repeatable returns.

Etharis is committed to:

- Scientific and regulatory integrity
- Transparent and ethical trade
- Efficient global supply chains
- Scalable, capital-efficient growth

OUR OPERATING CAPABILITIES

GMP MANUFACTURING & DISTRIBUTION

Australian GMP-aligned production through CMG partnership, enabling immediate packing, formulation, and supply into pharmacies and wholesale channels.

GLOBAL SUPPLY CHAIN CONTROL

Direct sourcing from Thailand and Canada, ensuring cost advantage, consistency, and scalable supply across multiple product formats.

STRUCTURED TRADE EXECUTION

End-to-end execution of cross-border cannabis transactions, including logistics, compliance, documentation, and delivery into licensed markets.

CAPITAL & TRADE FINANCE

Deployment of secured, short-cycle capital into inventory-backed transactions with escrow control and defined return structures.

REGULATORY & MARKET ACCESS

Expert navigation of TGA, EU-GMP, UK WDA, and international frameworks to enable compliant market entry and distribution.

COMMERCIAL & DISTRIBUTION STRATEGY

Pharmacy, clinic, and wholesale channel development across Australia, UK, and Europe.

ADDITIONAL CAPABILITIES

STRAIN & PRODUCT STRATEGY

Selection and optimisation of genetics and formats aligned to medical market demand and pricing dynamics.

GMP & OPERATIONAL SYSTEMS

Implementation of SOPs, QA/QC systems, and scalable manufacturing processes across partner facilities.

GLOBAL TRADE NETWORK

Established relationships with licensed producers, processors, and distributors across key international markets.

CAPITAL PARTNERSHIPS

Alignment with strategic investors and capital providers to fund inventory, expansion, and infrastructure.

SCALABLE INFRASTRUCTURE MODEL

Capital-light approach leveraging existing GMP facilities and partners to maximise return on invested capital.

GOVERNANCE & COMPLIANCE

Robust structures ensuring transparency, auditability, and regulatory alignment across all jurisdictions.

WHY ETHARIS?

Integrated Platform

End-to-end capability across manufacturing, global sourcing, and distribution.

GMP Manufacturing Capability

Operational production and formulation in Australia, supporting both internal brands and third-party partners.

Direct Global Supply Access

Established sourcing from key origin markets, enabling consistent quality and competitive pricing.

Multi-Channel Market Access

Distribution across wholesale, pharmacy, and telehealth channels, supporting scalable patient reach.

Regulatory Alignment

Built to operate within Australian and international regulatory frameworks, ensuring quality and compliance.

Execution-Focused

Built to deliver and scale across the full medicinal cannabis value chain.
